

## HDMI USB USB-C

### Overview

The USB-C

Digital AV

Multiport

Adapter lets

you connect

your USB-C or

Thunderbolt 3

(USB-C)

enabled Mac

to an HDMI display, while also connecting a standard USB device and a USB-C charging cable.

This adapter allows you to mirror your Mac display to your HDMI-enabled TV or display in up to 1080p at 60Hz or UHD (3840 by 2160) at 30Hz. It also outputs video content like movies and captured video. Simply connect the adapter to a USB-C or Thunderbolt 3 (USB-C) port on your Mac and then to your TV or projector via an HDMI cable (sold separately).

Use the standard USB port to connect devices such as your flash drive or camera or a USB cable for syncing and charging your iPhone, iPad, or iPod. You can also connect a charging cable to the USB-C port to charge your Mac.

Note: The Apple USB-C Digital AV Multiport Adapter is not compatible with the G-Tech G-DRIVE mobile USB 3.0 Hard Drive (Apple part number HF4F2VC/A).

**Compatible with the following computers:**

12-inch MacBook, 13-inch MacBook Pro - Thunderbolt 3 (USB-C), 15-inch MacBook Pro - Thunderbolt 3 (USB-C), 21.5-inch iMac - Thunderbolt 3 (USB-C), 27-inch iMac - Thunderbolt 3 (USB-C)

## HDMI Lightning

Use the Lightning Digital AV Adapter with your iPhone, iPad, or iPod with Lightning connector. The Lightning Digital AV Adapter supports mirroring of what is displayed on your device screen — including apps, presentations, websites, slideshows, and more — to your HDMI-equipped TV, display, projector, or other compatible display in up to 1080p HD. It also outputs video content — movies, TV shows, captured video — to your big screen in up to 1080p HD. Simply attach the Lightning Digital AV Adapter to the Lightning connector on your device and then to your TV or projector via an HDMI cable (sold separately).
