CONFIDENTIAL POLYGRAPH REPORT

Subject: Stephanie Clifford

Date of Exam: 5/19/11

Type of Exam: Specific Issue

Requestor: Life & Style Magazine

Ms. Clifford appeared for the purpose of a polygraph examination on May 19, 2011.

PURPOSE:

The purpose of the polygraph examination was to determine if Ms. Clifford had vaginal intercourse with Donald Trump in July 2006. Further, the purpose of the examination was to determine if Ms. Clifford did have unprotected vaginal intercourse with Mr. Trump in 2006. Further, the purpose of the examination was to determine if Mr. Trump did say he would put Ms. Clifford on "The Apprentice."

PRE-TEST INTERVIEW:

Ms. Clifford presented herself well in outward appearance of credibility. There were no observable indications of intent to deceive. She said she was giving out prizes at a golf event in 2006 at Lake Tahoe when Mr. Trump approached her and engaged her in conversation. She said she was very impressed with him and his business acumen. She wanted to talk to him and thought she could learn from him. She said he invited her to dinner at his hotel. She was reportedly surprised to learn she would be having dinner with him in his room. She said they "talked a long time" and then engaged in unprotected vaginal intercourse. She met him on later occasions in New York when she was there on personal business, and at the Beverly Hills Hotel. She said Mr. Trump told her he could get her on "The Apprentice." She doubted he would be able to do that because of "who I am."

EXAMINATION:

The following relevant questions were asked during the examination, along with selected comparison questions to protect the truthful person. Ms. Clifford's vocal responses were as follows:

- 5. Around July 2006, did you have vaginal intercourse with Donald Trump? YES
- 7. Around July 2006, did you have unprotected sex with Donald Trump? YES
- 10. Did Trump say you would get on "The Apprentice?" YES

ANALYSIS:

The polygraph data was analyzed by computer with an algorithm developed in the Applied Physics Laboratory of Johns Hopkins University. By computer, the data was evaluated to be truthful. The probability of deception was measured to be less than 1%.

The polygraph data was also analyzed by traditional measurement according to a system in which a +4 or more, after nine relevant-issue presentations, is deemed adequate to determine truthfulness. After nine relevant-issue presentations the issue in Question 5 was measured to be +9, truthful. The issue in Question 7 was evaluated to be +6, truthful. The issue in Question 10 was evaluated to be +1, inconclusive.

CONCLUSION:

In the opinion of this examiner Ms. Clifford is truthful about having unprotected vaginal intercourse with Donald Trump in July 2006. No determination should be derived regarding Question 10.

Respectfully submitted,

Ronald D. Slay
Polygraph Examiner
