

FIND THE LADY

A mixture of male and female first names have been hidden in the word square below. All words are in straight lines and can go horizontally, vertically and diagonally. They may read forwards or backwards. However, before you can root them out, you have to give the letters in the words below a twist, e.g., the first word on the list is AID, but the name you seek is IDA. When you have found all the names there will be four letters remaining that have NOT been used. Those letters arranged in a certain way will spell out the name of a lady. Who is the lady you seek?
