SPECIES:  
BARRELEYE FISH

CO-ORDINATES:  
DEEP SEA

FREAK RATING: 5/5

One fish sports a see-through head!

**FISH WITH A SEE-THROUGH HEAD:** The barreleye fish lives in the very deep and dark waters of the Atlantic, Indian, and Pacific Oceans. It has a transparent dome-shaped head filled with a clear, protective liquid surrounding two tube-shaped eyes. These eyes typically point upward but will rotate down to look straight ahead as it follows and eats its prey.
