

THE AMERICAN HEIRESSES' LONDON

Like New York's Fifth Avenue, Mayfair and Belgravia were almost entirely residential before World War I. And like Fifth Avenue, Mayfair and Belgravia are now much changed. What has not been lost to the wrecker's ball has been given over to shops and offices. Still, some of the London of the American heiresses remains. Just squint your eyes as you walk the streets suggested on the following pages, and try to remember that the air was much more polluted, the streets much narrower and the champagne much, much more intoxicating.
