The Rescue Effect

The Key to Saving Life on Earth

Michael Mehta Webster

As the world continues to grapple with intensifying climate change, the situation often feels hopeless. In his groundbreaking debut, Michael Mehta Webster proves that hope can be found in nature itself. The natural world has a series of systems—rescue effects—that automatically activate to help organisms when their environment changes. *The Rescue Effect* illustrates how we can use nature's natural resiliency to help reverse climate change.

Webster details what scientists are finding as they dig deeper into how nature rescues species on its own. These rescue effects are revealed in compelling stories of species that are adapting to the changing world—including tigers in the jungles of India, cichlid fish in the great rift lakes of Africa, and mountain pygmy-possums in the snowy mountaintops of southeastern Australia. At the center of each story, people play a significant role. Rescuing our environment is not passive, and Webster shows that it takes people working in concert with nature to reverse climate change.

Combining rigorous research and gripping storytelling, *The Rescue Effect* provides the cautious optimism we need to confront our greatest challenge.

Michael Mehta Webster is an expert in ecology, conservation, philanthropy, and non-profit management. His research interests focus on how organisms and ecosystems adapt to environmental change, how this information can be translated into effective conservation strategies, and the practical and ethical dilemmas that arise along the way.

- This is the cautiously optimistic look at climate change that readers have been waiting for.
- Will appeal to fans of books like *How to Avoid a Climate Disaster*, *All We Can Save*, *Regeneration*, and *Saving Us*.

We Are the ARK

Returning Our Gardens to Their True Nature with Acts of Restorative Kindness

Mary Reynolds

The loss of biodiversity is rapidly reducing the ability of the earth to maintain clean air and water and to provide food and habitat for all her creatures—including us. We must take direct action to alleviate the unjustifiable stress on the individual plants and animals and other life forms we share our planet with.

But how do we do it? In *We are the ARK*, award-winning garden designer Mary Reynolds provides an answer: by restoring nature to our home gardens and public spaces through acts of restorative kindness (ARK). So what is an ARK? It's a restored, native ecosystem, and a thriving patch of native plants and creatures that have been allowed to re-establish in the earth's intelligent, successional process of natural restoration. Over time, this land becomes a habitat for pollinators and wild creatures who are in desperate need of support.

In *We Are the ARK*, Reynolds details exactly how home gardeners can play a role, no matter the size of their space. Readers will be inspired to take part in positive environmental change and equipped to do so at home.

- Why do we need an ARK? We are losing more than 150 species every day.
- Mary Reynolds is an award-winning landscape designer, bestselling author of *The Garden Awakening*, and nature activist.
- Learn more about the movement at wearetheark.org.

Mary Reynolds is a reformed internationally acclaimed landscape designer. The youngest woman in history to win a gold medal for garden design at the Chelsea flower show in 2002, she has since given that all up to be part of the solution to the crisis we are all living through, the climate and biodiversity collapse. She is the bestselling author of *The Garden Awakening*.

American Roots

Lessons from the Designers Reimagining Our Home Gardens

Nick McCullough, Allison McCullough & Teresa Woodard

For decades, many American gardens fell short on originality. People were content with cookie-cutter landscapes—the iconic lawn or the perennial-lined front walk and picket fence—or they mimicked foreign styles like English cottage gardens and Japanese Zen landscapes. This has changed in recent years, as bold designers are championing an American design aesthetic that embraces regional culture, plants, and growing conditions.

American Roots celebrates this diversity by highlighting a thoughtfully curated list of designers and creatives with exceptional home gardens, focused on those who push boundaries, trial extraordinary plants, embrace a regional ethos, and express their talents in highly personal ways. Covering all the regions of the country, the profiles dive into design influences, share the back stories of the gardens and their designers, and offer information-packed sidebars with design tips and plant palettes.

Nick McCullough is a certified designer. He holds degrees in horticulture and art history from The Ohio State University and studied landscape design in Northwest England. **Allison McCullough** is the head of marketing for McCullough's Landscape & Nursery. **Teresa Woodward** has written for many publications, including *Better Homes & Gardens*. She currently serves as Contributing Garden Editor at *Midwest Living* magazine.

- This lush gift book explores how an American garden is defined.
- Profiles highlight creators from across the country, including Elizabeth Banks in California, Jeanette Bell in Louisiana, Benjamin Vogt in Nebraska, and many more.
- Nationally recognized for his artistic vision, Nick McCullough is the co-owner and lead designer at McCullough's Landscape & Nursery.

LEARN FROM NICK AND ALLISON

Scouting for Garden Finds

SHOP SMART ONLINE When shopping on the internet, have your list ready to search. Start with general terms for a broad exploration, then narrow to more specific. Try searching through open stock, nurseries, garden centers, outdoor departments, and outdoor stores. Also search for outdoor seasonal stores. Think garden supplies, plant stores, back-to-school stores, and more. When shopping for outdoor furniture, search down local sources (e.g., South & Huckleberry, Classic Home Interiors, Interiors and Tents).

DO YOUR RESEARCH Ask and buy on great plants to check prices on your own. Regularly inspect bargains.

SOURCE LOCAL FINDS ONLINE Visit Facebook and other online marketplaces for local finds. Always inspecting your finds to verify quality, and plan weekly gardeners around package.

Favorite Plants

Nick loves seasonal plants that look great even out of bloom, and through the Midwest's four seasons.

1. BLOOM THROUGHOUT Lavender—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **2. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **3. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **4. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **5. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **6. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **7. FOLIAGE THROUGHOUT** Shrub—winter green—can be used to create evergreen gardens throughout the garden, with long-lasting green foliage. **8. Mushrooms of the Pacific Northwest

Revised Edition

Steve Trudell

This completely revised edition of one of our bestselling field guides features all-new photographs, updated nomenclature, and additional safety information.

Mushrooms of the Pacific Northwest highlights mushrooms commonly found in Oregon, Washington, southern British Columbia, Idaho, and western Montana with an emphasis on the heart of mushroom country, the low- to mid-elevation forests of Oregon and Washington. Steve Trudell describes and illustrates 493 species of the region's most conspicuous, distinctive, and ecologically important mushrooms. Helpful identification keys, photographs, and a clear color-coded layout make this a must-have for hikers, foragers, and mushroom hunters.

• Ideal for birders, hikers, foragers, and natural history buffs, Timber Press Field Guides are the perfect tools for loving where you live.

• Our Timber Press Field Guide series has 300,000 combined copies in print.

• In recent years, mushroom hunting has exploded in popularity. Having a trusted, safe guide on hand is an important part of every expedition.

BOLETES

Steve Trudell belongs to the Mycological Society of America, North American Mycological Association, and International Mycorrhiza Society. He writes for several mycological publications and frequently serves as foray mycologist and lecturer for mycological societies.

The Complete Book of Ground Covers

4000 Plants that Reduce Maintenance, Control Erosion, and Beautify the Landscape

Gary Lewis

Ground covers are widely thought of as utilitarian—we turn to them when we have a problem that needs a solution. Yet these plants also offer a diverse range of beautiful and intriguing options with a variety of colors, textures, and forms. They can unify a landscape, knit together plantings and hardscape, and add extra layers of beauty, dynamism, and surprise.

The Complete Book of Ground Covers by Gary Lewis is a meticulously researched reference that profiles more than 4000 ground covers that can perform these roles with aplomb. No matter what kinds of conditions you're facing—shade, dry soil, heavy clay, excess moisture—there's a ground cover that will thrive and beautify your garden. Comprehensive, practical, and copiously illustrated, this indispensable volume belongs on the shelf of every serious gardener, designer, and landscape architect.

- An essential compilation of the most garden-worthy ground covers.
- The 4000 plants include varieties that can be used in a variety of zones and growing conditions.
- Gary Lewis is the owner of Phoenix Perennials, a popular retail nursery in Richmond, BC.

Gary Lewis has had a life-long interest in plants and gardening. His retail and mail order nursery, Phoenix Perennials, located in Richmond, BC, offers more than 5000 different plants. Gary has written for various garden magazines including *Fine Gardening* and has been a frequent guest on local and regional radio and television stations in British Columbia.

Experiencing Olmsted

The Enduring Legacy of Frederick Law Olmsted's North American Landscapes

The Cultural Landscape Foundation, Charles Birnbaum, Dena Winter-Tasse & Scott Carver

Frederick Law Olmsted is often described as the father of American landscape architecture. He, his firm, and the successor firms that sprung from it worked to shape our parks systems, our suburban neighborhoods, and some of our most beloved green spaces.

Experiencing Olmsted explores 200 of those spaces, including New York's Central and Prospect Parks, Stanford University's campus, the United States Capitol Grounds, Druid Hills in Atlanta, Lake Park in Wisconsin, and many more. Readers will find contemporary and historical photography and descriptions of each space that provide background on Olmsted's most important contributions. 2022 is the bicentennial of Olmsted's birth, and there is no better way to celebrate than with the pages of this beautifully packaged, thoughtful exploration of the firm's important legacy on North America's landscape.

- Celebrates Olmsted's important contributions by highlighting 200 of his most important works.
- 2022 marks the bicentennial of the birth of Frederick Law Olmsted.
- This lush gift book features more than 400 stunning color photographs, along with historical maps and drawings.

A non-profit established in 1998, **The Cultural Landscape Foundation® (TCLF)** connects people to places. TCLF educates and engages the public to make our shared landscape heritage more visible, identify its value, and empower its stewards.
