

# WINTER 2023

# Nature's Best Hope (Young Readers' Edition)

## How You Can Save the World in Your Own Yard

Douglas W. Tallamy & Sarah L. Thomson

**D**ouglas W. Tallamy awakened thousands of readers to an urgent situation: wildlife populations are in decline because the plants they depend on are fast disappearing. His solution? Plant more natives. In this book, Tallamy outlines his vision for a grassroots approach to conservation that everyone can participate in, regardless of age.

*Nature's Best Hope (Young Readers' Edition)* helps empower younger readers by breaking down complex concepts about conservation into simple terms kids can easily grasp. Younger readers can do many of the positive things that Tallamy encourages, like working with their family to plant oak trees at home, or if that's too large of a task, planting a few asters—a plant that many bees use to feed their young.

By empowering the next generation to help support our collective future, *Nature's Best Hope* drives home the positive point that it is kids that truly are nature's best hope.

**Douglas W. Tallamy** is a professor in the Department of Entomology and Wildlife Ecology at the University of Delaware, where he has taught insect-related courses for 40 years. His book *Bringing Nature Home*, published by Timber Press in 2007, was awarded the 2008 Silver Medal by the Garden Writers' Association.

**Sarah L. Thomson** has written over thirty books for young readers, including poetry, prose, fiction and nonfiction. She lives in Portland, Maine.

- A middle grade adaptation of the **New York Times bestselling book, *Nature's Best Hope*.**
- Explores conservation concepts that are accessible and appropriate for readers 8-12.
- For kids and caregivers interested in conservation, the environment, and nature.

# The Shotgun Conservationist

## Why Environmentalists Should Love Hunting

Brant MacDuff

In *The Shotgun Conservationist*, Brant MacDuff doesn't teach us how to hunt, he teaches us *why* to hunt. As public lands remain imperiled, factory farms pollute the earth and denigrate animals, and global uncertainty presses us all to be more self-sufficient, there has never been a better time to take up hunting. Writer, natural historian, and public speaker MacDuff has done just that. Growing up as an animal lover and avid non-hunter, MacDuff set out with some initial skepticism to investigate the claim that "hunting is conservation." He now holds a hunting license in four states and gives lectures on the positive impact it has on conservation efforts nationwide.

Armed with years of experience in the field and a deep love for the natural world, MacDuff tells the story of how he became a hunter and explains why, no matter your background, you should too. As he takes on popular misconceptions surrounding hunting, we meet the colorful characters and learn the firsthand research that changed his mind. All told with candor in a story that's equal parts provocative, scientific, humorous, and insightful. You may not find yourself on a hunting trip after reading this book, but you'll have a new perspective and appreciation for those that do.

**Brant MacDuff** is a taxidermist and conservation historian. An avid outdoorsperson and jack of many trades, Brant has worked for a variety of museums and aquariums, all while supporting his primary work as a public speaker. He teaches instructional classes on taxidermy, gives tours at the American Museum of Natural History, and lectures on natural history at schools, businesses, private events, outdoor retreats, and museums.

- The history and ethics of hunting, explored through the personal journey of author and animal lover, Brant MacDuff.
- Will appeal to fans of *Meat Eater*, *The Omnivores Dilemma*, and *Sacred Cow*.
- Follow MacDuff at [www.immortalanimals.com](http://www.immortalanimals.com).

# Rare Trees

## The Fascinating Stories of the World's Most Threatened Species

Sara Oldfield & Malin Rivers

**F**orests cover nearly a third of the world's surface, and the trees that make them up include a staggering diversity of more than 60,000 species. Individual trees play specific ecological roles in their unique environments—and they have adapted to thrive on steep mountains, in cloud forests, on dry savannahs, in parched deserts, and in tropical wetlands. Our history—and our future—are interwoven with the trees that define the regions of our green planet.

*Rare Trees* profiles over 60 individual species and seven major tree families—the most charismatic, fascinating, and downright bizarre examples of threatened trees from around the globe. Filled with hundreds of color photographs, maps to help readers identify habitats, and accessible text by tree experts from the Global Trees Campaign, *Rare Trees* will give readers a new appreciation for the importance of trees and will inspire them to preserve this critical canopy of life.

- Shares tree species that aren't widely known and are currently threatened by climate change and deforestation.
- Filled with color photographs, interesting facts, and details on conservation efforts.
- Published in partnership with The Global Trees Campaign.

**Sara Oldfield** has been Secretary General of Botanic Gardens Conservation International (BGCI) since May 2005. She is also Chair of the IUCN/SSC Global Tree Specialist Group, responsible for promoting and implementing projects to identify and protect globally red-listed tree species.

**Malin Rivers** is the Head of Conservation Prioritisation at Botanic Gardens Conservation International (BGCI). She has worked with plant conservation in botanic gardens for more than ten years.

# The Return of Wolves

## An Iconic Predator's Struggle to Survive in the American West

Eli Francovich

The gray wolf has made an astonishing comeback in Washington. Nearly eradicated by the 1990s, conservationists and environmentalists have cheered its robust return to the state over the last two decades. But Washington ranchers are not so joyous. When wolves prey on livestock ranchers view their livelihood as under attack. This tense situation speaks to America's larger political and cultural divide.

In *The Return of Wolves*, journalist Eli Francovich investigates how we might mend this divide while keeping wolf populations thriving. He finds an answer in the time-honored tradition of range riding and one passionate range rider, Daniel Curry, who has jumped directly into the fray by patrolling the rural Washington landscape on horseback. Curry engages directly with farmers, seeking to protect livestock from wolves while also protecting and proliferating wolf populations. Through Curry, we meet an eclectic cast of players—local ranchers, politicians, environmentalists, and everyday folks caught in the middle—and find hope for the future of wolves, and perhaps for our divided nation.

**Eli Francovich** is a journalist who covers the environment, conservation and outdoor recreation in Washington for the *Spokesman-Review*, the state's second-largest newspaper. His work has been published in the *Seattle Times*, the *Chicago Tribune*, the *Miami Herald*, the *Charlotte Observer* and elsewhere. He lives in *Spokane, Washington*.

- Will appeal to readers of *American Wolf*, *Wolf Nation*, and *The Rise of Wolf 8*.
- An engaging, well-reported, non-partisan story about a complex and divisive subject.

# Bicycling with Butterflies

## My 10,201-Mile Journey Following the Monarch Migration

Sara Dykman

**S**ara Dykman was the first person to bicycle alongside monarch butterflies on their storied annual migration—a round-trip adventure that included three countries and more than 10,000 miles. In *Bicycling with Butterflies*, she recounts her incredible journey and the dramatic ups and downs of the nearly nine-month odyssey. We're beside her as she navigates unmapped roads in foreign countries, checks roadside milkweed for monarch eggs, and shares her passion with eager schoolchildren, skeptical bar patrons, and unimpressed border officials. We also meet some of the ardent monarch stewards who supported her efforts, from citizen scientists and researchers to farmers and high-rise city dwellers.

**"This extraordinary book is a lament for our thoughtless destruction of nature and at the same time a celebration of the beauty that remains. The migration of the monarch butterflies is one of the wonders of the world—we must save it for future generations."** —Dr. Jane Goodall, DBE, Founder of the Jane Goodall Institute & U.N. Messenger of Peace

**"On this improbable adventure, Sara Dykman followed the extraordinary monarch migration by bicycle, and came back to write about it. Her almost incredible account captures the animal itself, the continent it crosses, and its plight with style and deep connection."** —Robert Michael Pyle, author of *Chasing Monarchs* and founder of the Xerces Society for Invertebrate Conservation

**Sara Dykman** is the founder of [beyondabook.org](http://beyondabook.org), which fosters lifelong learners, boundary pushers, explorers, and stewards. She works in amphibian research and as an outdoor educator, guiding young people into nature so they can delight in its complicated brilliance.

• **Winner of the 2021 National Outdoor Book Award.**

• **For fans of *Rooted* by Lyanda Lynn Haupt, *To Speak for the Trees* by Diana Beresford-Kroeger, and books by James Rebanks.**

# Ms. Adventure

## My Wild Explorations in Science, Lava, and Life

Jess Phoenix

Jess Phoenix has dedicated her life to scientific exploration. Her career path—hard earned in the male-dominated world of science—has led her into still-flowing Hawaiian lava fields, congressional races, glittering cocktail parties at Manhattan’s elite Explorers Club, and numerous pairs of Caterpillar work boots. It has also inspired her to devote her life to making science more inclusive and accessible.

In *Ms. Adventure*, Phoenix skillfully blends personal memoir, daring adventure, and scientific exploration, following Phoenix’s journey from reality television sites deep in Ecuadorian jungles to Andean glaciers, university classrooms to Death Valley in summer. Readers will delight in her unbelievable adventures, all embarked on for the love of science.

**“Whether she is peeking into the top of an active volcano or trying to outwit the heat of the desert, Jess Phoenix brings her best game: the cunning of a detective, the soul of a poet and the open mind of a true explorer. It is pure joy to see the world through her endlessly curious eyes and to read about it in her crystal-clear prose.”**

—Madeleine H. Blais, author of *In These Girls, Hope Is a Muscle*

**“Jess Phoenix's work encompasses science and representation in such a delightful melding that it could only come from as spry and playful a soul as hers! Open this book and jump into the volcano!”**

—Patton Oswalt

**Jess Phoenix** is executive director and co-founder of the environmental scientific research organization *Blueprint Earth*. Since 2008, she has been a volcanologist, an extreme explorer, and a professional field scientist. She is a fellow in the Explorers Club and the Royal Geographical Society.

• **Finalist for the 2021 AAAS/Subaru SB&F Prize for Excellence in Science Books.**

• **For fans of books like *Spineless* by Juli Berwald and *Lab Girl* by Hope Jahren.**

# The Pacific Northwest Native Plant Primer

## 225 Plants for an Earth-Friendly Garden

Kristin Currin & Andrew Merritt

The benefits of native plants are enormous—they reduce maintenance, require less water, and attract vital, earth-friendly pollinators like birds, butterflies, and bees. Gardeners seeking to add them to their landscape will find no better guide than *The Pacific Northwest Native Plant Primer*. Packed with proven advice that every home gardener can follow, this incomparable sourcebook profiles 225 recommended native ferns, grasses, wildflowers, perennials, vines, shrubs, and trees.

With introductory information on preparation, planting, maintenance, and climate considerations, it's everything you need to know to create a beautiful and beneficial garden. This must-have handbook is for gardeners in the beautiful Pacific Northwest.

- The native plant trend continues to grow; they now represent more than 20% of total plant sales.
- Native plants attract pollinators, support wildlife, and reduce maintenance.
- For home gardeners in Oregon, Washington, and southern British Columbia.

**Kristin Currin and Andrew Merritt** are the owners of Humble Roots Farm and Nursery in Mosier, Oregon. Through Humble Roots, they have worked on many restoration and pollinator enhancement projects including rare plant monitoring and propagation, as well as with many homeowners and landscapers developing native gardens and habitats.

# Wild Miami

## Explore the Amazing Nature in and Around South Florida

Thomas J. Morrell, Shannon C. Jones, Brian Diaz & Fernando M. Bretos

Miami may be a bustling city with a vibrant nightlife, but its wildlife is just as wild, if you know where to look. *Wild Miami* reveals the amazing ecology of this tropical metropolis. Equal parts natural history, field guide, and trip planner, *Wild Miami* has something for everyone. This handy yet extensive guide looks at the factors that shape local nature and profiles more than 100 local species, from beautiful flowers and towering palm trees to manatees and green treefrogs, spotted sunfish, and great blue heron. Also included are descriptions of day trips that help you explore natural wonders on hiking trails and beaches, in public parks, and in your own backyard.

- Covers more than 100 local species that can be seen in and around Miami.
- Includes days trips to areas of ecological importance.
- All four authors are scientists who focus their work on the flora and fauna of Miami.

**Thomas J. Morrell** is a freelance writer with a degree in journalism from the University of Florida.

**Shannon C. Jones** is the Conservation Programs Manager at the Phillip and Patricia Frost Museum of Science.

**Brian Diaz** is the Coordinator for the MUVE program at the Phillip and Patricia Frost Museum of Science.

**Fernando M. Bretos** is a conservation scientist and manager of the Wider Caribbean Region at the Ocean Foundation.

# Wild Philly

## Explore the Amazing Nature in and Around Philadelphia

Mike Weilbacher

Philadelphia may seem like a concrete jungle, but in reality, it's full of amazing wildlife. You just need to know where to find it! Equal parts natural history, field guide, and trip planner, *Wild Philly* has something for everyone. This handy yet extensive guide looks at the factors that shape local nature and profiles more than 100 local species, from beautiful flowers and towering trees to majestic birds and surprising city-dwellers like coyotes and red foxes. Also included are descriptions of day trips that help you explore natural wonders on hiking trails, in public parks, and in your own backyard.

- Covers more than 100 local species that can be seen in and around Philly.
- Includes days trips to areas of ecological importance.
- Mike Weilbacher is the executive director of the Schuylkill Center for Environmental Education.

Naturalist **Mike Weilbacher** has directed the Schuylkill Center for Environmental Education in Philadelphia's Upper Roxborough neighborhood since 2011. Mike has more than 40 years of experience teaching through lectures, field trips, writings, and even theater and radio, his work earning him the Keystone Award from the Pennsylvania Association of Environmental Educators and the title of "Citizen Hero" from The Philadelphia Inquirer.
