

PRINTING INSTRUCTIONS for *Treat Yourself!* Templates

For best results, read and follow these steps before printing.

1. Using Adobe Acrobat, open the PDF template associated with the project you'd like to make.
2. Click "Print" and a dialogue box will open.
3. In the Page Sizing & Handling field, select "Poster."
4. The "Tile scale" should be set at 100% and the "Overlap" should be set at 0.005 in. Below these two fields are three check boxes. Check all three: Cut marks, Tile only large pages, and Labels.
5. Make sure the "Copies" field is set to 1. Press Print.
6. Refer to page 10 in the book for instructions on how to tile the printed pages together.
