

INSPIRED BY NATURE'S DESIGN

From the earliest snowdrops to alpine violet, tulips, and late autumn crocuses, bulbs add interest and color to the garden throughout the year.

Renowned naturalistic garden designer **Jacqueline van der Kloet** has mastered a nonchalant and magical style, where bulbs emerge playfully, dancing among perennials and grasses.

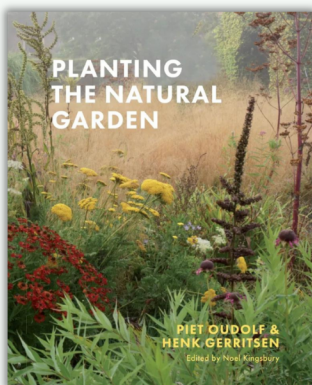

This exquisitely photographed guide offers advice on bulb varieties, planting methods, and handy tools for gardeners working in spaces large and small.
